Statement of Capabilities Flight Research Associates Inc. (March 2018)

Flight Research Associates, Inc. (FRA) is a Veteran-owned small business, specializing in advanced aviation research, development, engineering, test, evaluation and training.

FRA was established in 2005 to provide NASA, the FAA and private industry with aviation professionals (pilots, air traffic controllers, traffic management specialists, airline dispatchers) to enable Air Traffic Management and Human Factors research. Since then, our mission and customer base has grown to include database administration, software and systems engineering, and Live, Virtual, Constructive Distributed Simulation engineering for the FAA, DoD and industry partners. Our associates number over 1,000 and have experience in the United States, Europe, Australia and Asia.

FRA is an Oregon corporation and a California alien corporation with primary operations and offices located in the NASA Research Park at Moffett Field, California. We are capable of providing services anywhere in the world. Our government client base includes NASA, FAA, Navy, and Army. Our non-government clients include the Universities Space Research Association (USRA), ATAC, Boeing, MITRE, Los Angeles World Airports (LAWA), Pan Am International Flight Academy, UPS Airlines, Solentus, Meggitt Defense Systems, DynEd International, and Harcourt Assessment. Our track record demonstrates persistent excellence in service by providing hands-on continual engagement at the highest levels of FRA and customer leadership. We have provided services under both Prime Contractor and Sub-Contractor agreements.
